## Left-hand drive cars exported

By Our Staff Reporter

KARACHI, March 9: Transmission Motor Company has exported two first left-hand drive vehicles to Qatar. The keys of two of its vehicle variants, Alif Cars and Bay Pickup Truck, were handed over to Jassim M. Sharshani for onward delivery to Ahmad Bin Sultan Al Assiri of Qatar.

The manufacturer of these vehicles is fully geared to meet the needs of left- and right-hand drive vehicles to cater to the local as well as export market. This diversification capability will enable the company to tap the export market and earn valuable foreign exchange for the country.

The trial export orders are expected to result in more orders from the emirate of Qatar, as the company has significant orders from Africa and South America, says a press release.
